DISPUTE: CARRIAGES 3 & 1

There is a dispute between Carriage 3 and Carriage 1. Cynthia Lee from Carriage 3 is low on medical supplies. They want another carriage to donate a few units.

Susan Washington from Carriage 1 agrees to trade, but demands a swap for food.

You can select an option and the passengers will carry it out. However, the disappointed leader will become a temporary detractor for one week.

Note: You can press [ESC] now to consult the notebook. However, you must make a decision before the game can continue. To return to the dispute, click on the message capsule on the carriage station desk.

LET THEM NEGOTIATE

The best negotiator in Carriage 3 (Terry Ward) has a 32% chance of success vs Christine Sanchez from Carriage 1. If you let the passengers negotiate an option, all the effects will still apply. However, the disappointed leader will maintain their current favour status.

[It's like Ubermosh or Overture, but in bullet hell form. This doesn't mean it's bad, though it does seem like a possible Unity asset flip \(I don't know personally if it is or not\). It's got plenty of pretty colors as well, three different classes categorized by their special attacks, and a score that is catchy at times, but also can be barren or non-existent. Hopefully the audio is just due to being early access 1.1.](#)

[I have no idea if some of the things I think are glitches are meant to be there though. There's no options menu or anything that explains the controls over than a quick explanation on WASD and how the mouse works in the game. I hit O and P at times, and random things happened, as if I were using special items, not to mention sometimes hitting Z or T and teleporting to the next level.](#)

[It has potential, and I'm anxious to see further builds. I don't regret the purchase and suggest it while it's on sale if this is your kind of thing.](#)

[. A pretty cute game about using a slime to solve logic puzzles. Definitely worth a try when more levels are added in the future.. you cant start a game it in. dont buy this game yet.. I highly recommend this game to people who want to spend time on educational games.. Well, I really wanted to like this game.](#)

[I am so disappointed in this game, it inspired me to post this. The first review I have ever written.](#)

[I made the purchase so I could get MWR, and while some of the additions are great, the lack of dedicated servers has ruined shooters for me.](#)

[The Cheating is rampant, and there is no recourse. I cant tell you how many killcams I have watched with obvious aimbotting. "Report Player" ? Really? Like anyone actually believes that will do anything.](#)

[Add to that the load times and the buggy netcode that disconnects you from the lobby every third game and the game becomes a frustrating mess.](#)

[I have owned almost every iteration of this game from the original until now. \(Most I purchased on Release Day.\)](#)

[Sadly this is the last one I will buy.. I bought this today and have spent hours playing it. It is a game of balancing your priorities. You're always needing food, which you have to buy either at the grocery store or if you purchase appliances \(and they don't get stolen\) you can make at home. You're always needing fun. You're always needing health improvements \(exercising\). You're always needing a shower, because eating, having fun or exercising makes you stink.](#)

[Manage all that, plus a job. Awkward, but doable.](#)

[Manage all that, plus a job, plus going to school. More interesting.](#)

[You can invest your money in the stock market and get some returns from that. Loans are a little odd and it took me a while to figure them out. You borrow money for a property then bid on the property. This can actually save you money sometimes. Being able to rent out properties would be a great feature.](#)

[Mods definitely make this game 100% better.](#)

[There's a demo if you want to try it out first. For \\$10 it is a great game. For \\$14 it is a ok game. I'm not sure how much playability it will be in the long run, but it's interesting.](#)

Nice benchmark. I love the 3 runs for the sake of accuracy.. it's nice to have it, however is this going to be transferred over for mac pleasssseeeee!!!! Also can the prequel Pack be transferred to mac as well.. It's pretty 'cheaty' but more abilities is more fun :D *_*. Sci-Fi Amnesia clone.

Now, I already think that Amnesia is a terrible *video game*, but this isn't any better. This is clearly unfinished, with subtitles being extremely offbeat, mouse acceleration that you can't turn off, and stuttering. The "gameplay" is timed, the timer being toxins that will eventually kill you. This is combined with the "gameplay" of having to sit in a corner and wait for a monster to go away. If you can't see that's some real awful design, then I don't know what to tell you. That's all there is to this game; it's ugly, it runs poorly, it's a bad clone of a better (albeit still bad) game, and it's a total waste of time.. Cons: - **Level V Map Design: Level design of this game is one of the worst I have ever experienced. Throughout the game I was stuck in multiple places because I wasn't able to find the way I was supposed to. First part of the game is designed "pretty well" but as you progress it only gets worse. Game becomes one big maze and you spend way too much time going back the way you came because you found another dead end. It's not that much of a big deal but since it happens so frequently it makes game really frustrating.**

- **Quests: Quests are another big flaw of this game, if you do only the main quests you will finish this game in about 3-4 hours maybe even less which is really low considering the game costs 20€ when it's not on sale, so to increase your playtime you might want to do some side quests which aren't really that good anyway. All side quests are basically 2 different quests 1. Clear area 2. Bring an item(s) to someone and if that's not enough every single quest makes you go across entire map just to make your playtime longer the cheapest way possible.**

Good example of a quest in this game: Talk to someone, walk across entire map just to find out the thing isn't there, go to another location also located on the other side of the map, take the thing and bring it back to the other side of the map. Yeah it's good it only happens in side quests right? Wrong cause lots of main quests are also made like this. Remember when I said it takes about 3-4 hours to finish this game? Scratch that and add another 10 hours worth of gameplay spent entirely only on walking from point A to point B.

Bullet sponge: Every single "boss" in the game is basically just a bullet sponge which kills you in 2-3 hits and is also swarmed by regular zombies

Game feels like it was rushed : Animations aren't that good, And voice acting makes this game look like a joke.

Like seriously you can buy Dead Island for the same price and get a 1000x better experience than this. Like the only possible pros I can think of could possibly be story which could be interesting if only the game didn't ruin it with ridiculous animations and voice acting. Also graphics aren't that bad but considering this is a "DEFINITIVE Edition" they could've done a better job.

Summary: Not worth 20€ wait for a sale, you can't really complain if you got this game for 5€ but this game really isn't worth 20€. Game feels like it was rushed and devs only paid attention to "how to slow the player as much as possible".

Also if you have a friend to play with scratch everything above, cause every piece of garbage can be fun with friends
